EDUCATION

- Arizona State University, Tempe, AZ** *August 2024 - Present*
PhD in Computer Engineering (Computer Systems), GPA - 3.91/4.00
- Arizona State University, Tempe, AZ** *August 2022 - May 2024*
M.S. in Computer Engineering (Computer Systems), GPA - 3.83/4.00
- Maulana Azad National Institute of Technology, India** *August 2017 - April 2021*
B. Tech. in Electronics and Communication Engineering, GPA - 7.98/10.00

RESEARCH EXPERIENCE

- Logos Robotics Lab: *Research Associate*** *May 2023 - Present*
PI: Dr. Nakul Gopalan
Focus Area: Improving Manipulation Policies.
 - Improve generalist manipulation policies using sim-to-real transfer and human demonstrations.
 - Learn generalized object models capturing geometry and articulation to complement robot skills.
- Autonomous Agents and Intelligent Robots Lab: *Student Assistant*** *Aug 2023 - Oct 2023*
PI: Dr. Siddharth Srivastava
Focus Area: Capability Discovery in Learning Agents.
 - Conducted capability analysis of learning agents for decision-making tasks.
 - Developed models to infer action representations from state transitions.

PUBLICATIONS

- Monkey See, Can Monkey Do? A Benchmark for Evaluating Robot Skill Learning by Observation**
Weiwei Gu*, **Anmol Gupta***, Anant Sah*, Ryan Sam Varghese, Lalitha Vanam, Prabhath Adireddi, Peter Karkus, Nakul Gopalan
Conference on Robot Learning (CoRL), 2026
- PokeNet: Learning Kinematic Models of Articulated Objects from Human Observations**
Anmol Gupta, Weiwei Gu, Omkar Patil, Jun Ki Lee, Nakul Gopalan
International Conference of Robotics and Automation (ICRA), 2026
- Continual Robot Skill and Task Learning via Dialogue**
Weiwei Gu, N. Suresh K. Kondepudi, **Anmol Gupta**, Lixiao Huang, Nakul Gopalan
Under Review

PROFESSIONAL EXPERIENCE

- e2Serv Technologies: *Software Development Engineer*** *August 2021 - June 2022*
 - Designed backend for "Employee Handling System" by utilizing **Spring Framework**, **Java** and **Thymeleaf** and used **JPA** methods for database connections.
- Swaayatt Robots: *Deep Learning Intern*** *January 2021 - July 2021*
 - Designed and developed a **Fast R-CNN** network to detect and recognize traffic signs in clustered environment of India with an accuracy of 87%.
 - Developed an algorithm by utilizing **Style Transfer** and **conditional GANs** to convert clear environment images into rainy and dusty environment for data augmentation.

RELEVANT COURSEWORK

Reinforcement Learning, Data Driven Optimization, Perception in Robotics, Artificial Intelligence, Foundation of Algorithms, Advances in Robot Learning, Artificial Neural Computations, Statistical Signal Processing, Digital Image Processing.
